Grounded Electric (One Man) Square Head Concrete Vibrators

Select the head, shaft and motor combination that meets your need!

The 12-amp motor will drive four head sizes, 3/4", 1", 1 3/8" and 1 3/4". The 15-amp motor will drive five sizes, 1 3/8", 1 3/4", 2", 2 1/4" and the 2 1/2" SBI Short Head. Wyco's grounded motors are extremely lightweight, yet deliver more power than ever before. A continuous loop steel frame design protects the motor under very abusive situations.

These completely redesigned electric vibrators reflect years of research and development that have made Wyco the world leader in concrete compaction. You can count on Wyco vibrators. The 12- and 15-amp motors have been designed and manufactured to pass the critical requirements of both UL and CSA. A combination of these two motors will handle the entire range of existing Wyco Square Heads.
